Skills

- Java | Python | JavaScript | TypeScript | Node.js | Express.js | React | Redux | HTML5 | CSS3 | C++ | C | OOP | SQL | NoSQL
- MongoDB | MySQL | PostgreSQL | REST APIs | Microservices | Distributed Systems | Full-Stack Development | Web Development
- AWS | GCP | Docker | Kubernetes | CI/CD | AWS Lambda | Cloud Computing | Kafka | Event-Driven Systems
- Git | GitHub | Bitbucket | Jira | Postman | Swagger (OpenAPI) | Jest | XUnit | Unit Testing | Problem-solving | Communication

Experience

Software Engineer Intern (Full stack)

Kukbit SL Pvt.Ltd.

Pune, India

Oct 2025 - Present

- Led development of 6+ enterprise microservices improving system throughput by 35%, driving millions of revenue every year using the latest technologies of **NodeJS, Javascript, Express, MongoDB, docker, k8s, and Typescript**.
- Designed and deployed 20+ scalable REST APIs with <120ms latency and background workers for managing first- and third-party proprietary finance applications.
- Managed Kubernetes deployments across multi-node clusters, improving uptime to 99.9% from identifying system requirements and partner dependencies to workload balancing, software implementation, engineering, testing, and configuring metrics, alarms, monitors, and dashboards.
- Enriched system metrics by integrating the platforms with telemetry; facilitated in-depth logging by correlating APIs with vector contexts.
- Implemented CI/CD pipelines reducing deployment time by 40%, pull requests, code reviews, load/stress testing, unit/integration/e2e testing

Java Developer Intern

CodeClause

Jul 2024 - Oct 2024

- Developed and maintained backend features for enterprise applications using Java, Spring Boot, REST APIs, and MySQL/ MongoDB.
- Built and optimized microservices following clean architecture principles, improving reliability and performance of financial platforms.
- Contributed to deployment and monitoring of applications on Docker and Kubernetes, including metrics configuration, logging, and alerting.
- Supported CI/CD activities, code reviews, unit testing, and integration testing to ensure high-quality releases and faster delivery cycles.

Education

Bachelor Of Computer Applications

Lucknow 2023 - 2026

Major: Computer Science | CGPA: 8.5/10

Goel Institute Of Higher Studies Mahavidyalaya

Projects

- **Two-Factor Authentication System:** Designed and developed a production-grade Two-Factor Authentication (2FA) system using Java and Spring Boot featuring email/SMS OTP verification, token-based login, session validation, rate-limited retry logic, and recovery workflows, seamlessly integrated via REST APIs to strengthen account security and enhance overall user experience.

Skills Used: Node.js, Express.js, MongoDB, JWT, Passport.js, Twilio Authy API, bcrypt, EJS, REST APIs, Session Management, 2-Factor Authentication Integration

- **P2P File Sharing On Local Network:** Implemented a LAN-based P2P system supporting 50+ MB/s transfer speed system that allows multiple devices on the same local network to discover each other automatically and exchange files without relying on any cloud backend. The system supports high-speed transfer, secure handshake between peers, drag-and-drop uploads, and real-time progress tracking. It is built to handle large files efficiently, manage simultaneous connections, and ensure data transfer privacy within the network.

Skills Used: Node.js, Express.js, WebSockets, Peer-to-Peer Networking, File Transfer Protocols, Socket.IO, JavaScript, Network Security, REST APIs

- **AI-Powered Text Classifier:** Built and developed ML classifier achieving 92% accuracy on test data capable of analyzing user input and automatically categorizing sentences into relevant labels using natural language processing and machine learning. The model learns from training data, handles noisy text, and improves prediction accuracy through preprocessing steps like tokenization, stemming, and stop-word removal. It includes a scalable backend pipeline for classification requests and delivers fast, real-time results through a simple user interface.

Skills Used: Python, Scikit-Learn, NLP, Machine Learning, Pandas, Flask, Text Preprocessing, Model Evaluation

- **Hospital Management System:** Built HMS reducing manual processing time by 60% across registration, billing, doctor scheduling, appointment tracking, medical records management, billing, and discharge workflows in a single integrated platform. The system improves hospital efficiency by digitizing operations, reducing manual errors, and offering role-based access for administrators, doctors, nurses, and patients. It provides real-time availability of doctors and beds, secure storage of patient history, and automated billing to enhance hospital operations and patient experience.

Skills Used: Java, MySQL, JDBC, Swing/JavaFX, Object-Oriented Programming, MVC Architecture, SQL Queries, Authentication and Authorization

- **Tour & Tourism Website (Full Stack):** Built a full stack Tour & Tourism web platform that allows users to search destinations, explore tour packages, compare pricing, book trips, and manage itineraries in one place. The system includes user authentication, secure payments, real-time booking status, admin control for managing packages and offers, and a responsive UI for smooth browsing on all devices. Designed to provide a seamless experience from trip discovery to booking confirmation.

Skills Used: React, Node.js, Express, MongoDB, JavaScript, REST APIs, JWT Authentication, Redux, HTML, CSS, Responsive Web Design, Payment Gateway Integration

- **Phone Number Location Tracker (Python):** Developed a phone number location tracker using Python that identifies the registered telecom carrier, country, and approximate geographic location of a mobile number. Integrated external APIs and geolocation libraries to fetch live details and display the results on an interactive map interface. Designed with a focus on accuracy, error handling, and efficient data lookup.

Certifications & Achievements

- GenAI Powered Data Analytics Job Simulation - Jun 2025
- Cybersecurity Analyst Job Simulation - Jul 2025
- Oracle Cloud Infrastructure 2025 Certified Foundations Associate - Aug 2025
- TCS iON Career Edge - Young Professional - Sep 2025
- J.P.Morgan - Software Engineering Job Simulation - Sep 2025

- Recognized among top 5% performers with CGPA 8.5/10 in BCA program.
- Solved 350+ LeetCode problems including 120+ medium/hard; achieved global rank #1200 in Weekly Contest.
